

Harlequin TransFuel

The Harlequin TransFuel is the UK's first bunded ADR approved mobile refuelling tank made from lightweight MDPE

By combining a fully bunded fuel tank with an 12v transfer pump set, Harlequin have managed to provide an environmentally compliant system at a market leading price.

Featuring a PIUSI brand 12v dispensing system, the equipment comprises of a self priming transfer pump with 4m delivery hose and automatic trigger nozzle.

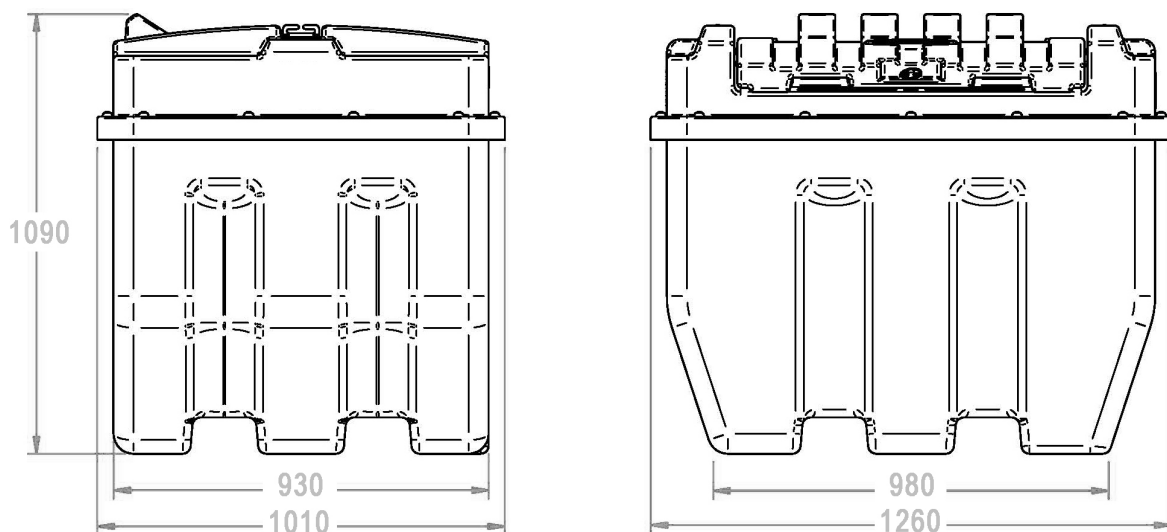

Installation is quick and simple, the tank is ready to use as soon as it is offloaded and features both lifting eyes and convenient forklift pockets.
