## Specification

<b>Manufacturer</b>	SPIN SECURE
<b>Type</b>	Fully Secure Key Operated Locking Fill Point
<b>Model</b>	SS50-3
<b>Material</b>	Non ferrous Zinc Alloy
<b>Fitting Size</b>	2" BSP
<b>Lock Type</b>	Unique key (3x supplied)

Spin-secure locking fill point cap, suitable for all types of fuel or oil storage tank with a 2" BSPP fill connection.

Both commercial and domestic fuel theft is on the rise, protect your storage tank with this effective tank lock.

The spin secure device is quick and easy to install as the self sealing connection eliminates the need for pipe sealants when fitting.

To install, simply screw the mounting boss over any existing 2" BSPP fill point until tight. The unique design utilises Spin Secure technology in that when the cap is locked it spins freely and is almost impossible to remove, even with a crowbar.

Supplied complete with three keys included, Each unit features an individually coded locking system can only be operated with the corresponding key set.
